FOREWORD

The Pond Dynamics/Aquaculture Collaborative Research Support Program (PD/A CRSP) represents an international community of researchers and institutions dedicated to strengthening health and nutrition in developing countries by improving the efficiency of pond aquaculture systems. It is one of several agricultural CRSPs supported by the U.S. Agency for International Development under the authority of Title XII of the International Development and Food Assistance Act of 1975.

The "Global Experiment" in Pond Dynamics/Aquaculture is the major CRSP research activity, covering the period from 1982 to 1987. The Global Experiment was designed to quantitatively describe the physical, chemical and biological principles of pond culture systems. The information gained from the Global Experiment will be used to improve production technologies and develop quantitative production functions to facilitate rigorous economic analyses of aquaculture systems.

Standardization is a key element of the Global Experiment. Standardization permits the comparison of data from diverse geographic locations. The experimental design involves monitoring specified environmental and fish production variables in accordance with standardized work plans in twelve or more ponds at each of seven geographical locations. The variables observed, frequency of observation, and materials and methods are uniform for all locations. The field data are filed in a centralized data base, called the CRSP Central Data Base. Statistical methods will be used to test hypotheses about correlations between variables and to evaluate the sources of variance within ponds, between ponds within locations, and between locations.

The CRSP Central Data Base will be used to develop predictive models of the processes occurring in pond culture systems. The models will be used to provide guidance for ongoing and future research, to predict the performance of existing and proposed pond systems subject to specific inputs and constraints, and to improve the operation and efficiency of pond culture systems.

The Global Experiment includes three cycles of experiments. Each cycle consists of two series of observations, one during the dry season and one during the wet season. The objective of the first cycle is to create a detailed baseline of chemical, physical, and biological data on all ponds treated with a standard level of inorganic fertilizer. In the second experimental cycle, ponds treated with inorganic fertilizer are compared to ponds treated with organic fertilizer. In the third cycle, the responses of ponds to different levels of organic fertilizer are compared.

The goal of the Pond Dynamics/Aquaculture Collaborative Research Data Reports (referred to as Data Reports) is to record the CRSP Central Data Base and to present interpretations of site specific results. The Pond Dynamics/Aquaculture CRSP has conducted the Global Experiment at seven project sites in six developing countries: Thailand, Indonesia, the Philippines, Panama, Honduras, and Rwanda. The first volume of these reports provides descriptive information for each CRSP site. It presents the physical characteristics of each site, including a geographical sketch, climatology, and water and soil analyses. Experimental cycles are described in CRSP Work Plans One to Three, which are summarized in the first volume.

Volume One will serve as the reference volume for the entire report series. Subsequent volumes will focus on each site separately. Each Data Report will include one cycle (wet and dry seasons) of the Pond Dynamics/Aquaculture CRSP Global Experiment. Therefore, with few exceptions, each project site will have three Data Reports devoted to it, representing the results of the three cycles of the Global Experiment. In addition to the hard copy of experimental data published as a part of each Data Report, data are also available from the PD/A CRSP in electronic form (on diskette) for computer analysis. Cycle III of the Global Experiment in Aguadulce, Panama is presented in this volume.

LIST OF DATA TABLES

Complete Set of Data from Cycle III of the Pond Dynamics/ Aquaculture CRSP in Aguadulce, Panama

Table 1.	Daily Weather Measurements. Aguadulce, Panama. Cycle III, Wet Season.....	1

UNITS OF MEASUREMENT AND ABBREVIATIONS USED IN THE APPENDIX TABLES

Daily Weather Measurements:

SOLAR1 (solar radiation).....	E/m ² /d
SOLAR2 (solar radiation).....	cal/cm ² /d
RAIN (rainfall).....	cm/d
WIND (wind speed).....	km/hr
ATEMPMAX (max air temperature).....	°C
ATEMPMIN (min air temperature).....	°C
EVAP (evaporation).....	mm/d

Daily Pond Measurements:

DEPTH.....	m
INFLOW.....	m ³ /hr
OVERFLOW.....	Y/N
"nil".....	<i>Oreochromis niloticus</i>

Weekly and Twice-Weekly Measurements:

All DO (dissolved oxygen).....	mg/L
All TEMP (temperature).....	°C
ALKA (alkalinity).....	mg/L (as CaCO ₃)
HARD (total hardness).....	mg/L (as CaCO ₃)
All N (Kjeldahl, NO ₂ , NO ₃ , Total).....	mg/L
All P (Total, Ortho-PO ₄).....	mg/L
SECCHI DISK.....	cm
CHLOROPHYLL a, b, or c.....	mg/m ³

Diurnal Measurements:

All DO (dissolved oxygen).....	mg/L
All TEMP (temperature).....	°C

Fish/Shrimp Stocking, Sampling, and Harvesting:

"STK".....	stocking
"SAM".....	sampling
"HAR".....	harvesting
"VAN".....	<i>Penaeus vannamei</i>
POP. WEIGHT.....	kg
SAMPLE LENGTH.....	cm
REPROD. WEIGHT.....	kg

Plankton and Benthos:

NET (PRIMARY) PRODUCTION.....	mg C/m ³ /d
GROSS (PRIMARY) PRODUCTION.....	mg C/m ³ /d

Water Quality Characteristics:

ALKALIN (alkalinity).....	mg/L (as CaCO ₃)
HARDNESS	mg/L (as CaCO ₃)
All N (NH ₃ , NO ₂ , NO ₃ , NO ₂ +NO ₃)	mg/L
All P (Total, Ortho-P)	mg/L
Cl ⁻	mg/L
SALT	ppt
SO ₄	mg/L
BORON	mg/L
CALCIUM.....	mg/L
COPPER	mg/L
IRON.....	mg/L
MAGNESIUM	mg/L
POTASSIUM.....	mg/L
SODIUM.....	mg/L
ZINC.....	mg/L

Pond Soil Characteristics:

CLAY	%
SILT	%
SAND	%
ORGANIC MATTER	%
SOIL-P.....	ppm
SOIL Ca	meq/100g
SOIL Mg.....	meq/100g
SOIL K	ppm
SOIL Na.....	meq/100g
SOIL N.....	%
SOIL NH ₄	ppm
SOIL NO ₃	ppm
SOIL CEC.....	meq/100g
SOIL SALT	mmhos/cm
SOIL Al.....	ppm
SOIL Fe.....	ppm
SOIL Zn.....	ppm
SOIL Mn.....	ppm
SOIL Cu	ppm
SOIL SO ₄	ppm

Analysis of Nutrients and Lime:

FD1	feed type 1
TSP	"triple superphosphate"
All NUTRIENTS	% (dry matter basis)

Nutrient and Lime Inputs:

FD1	feed type 1
All QUANTITIES.....	kg/ha
TSP	"triple superphosphate"
"cac"	CaCO ₃

Analysis of Feed Inputs:

FD1	feed type 1
All QUANTITIES.....	kg/ha
